Microchanneling Post-Care

1. If any Microchannel Delivery Solution roll-on remains, apply continually until gone.
2. No other products should be applied until the following day.
3. When the numbing wears off your skin may feel like a mild sunburn. You may apply cool compresses as desired.
4. Needle lengths of 0.25mm, 0.5mm will result in mild redness and swelling for up to 24 hours.
5. Beginning the following morning; apply the Livra Cellular Renewal Serum and Healing Accelerator to enhance results. (Cleanse and apply 1-3 pumps). Apply daily, morning and evening.
6. Peeling and skin sloughing may occur for several days after treatment.
7. Trans Epidermal Water Loss is a common temporary side effect and could leave you feeling dry. Keep the recommended moisturizer with you during the day and apply as frequently as necessary to avoid a dry sensation.
8. Return for a follow up treatment in about a month or as recommended.

If you have any questions, please **email or call Trisha.**
